

On behalf of our Local Organizing Committee, we are pleased to announce that the sixth Adaptive Optics for Extremely Large Telescope will take place in Québec City, Canada, from Sunday June 9, 2019 to Friday June 14, 2019 at the Quebec City Convention Centre.

Building on the success of past editions, the AO4ELT6 conference will provide an exciting forum for listening to leading experts sharing their recent findings in the field. This year, we expect more than 200 attendees from all over the world and this creates a unique venue to access a targeted audience of highly interested engineers, scientists, project managers, and industry experts.

We are planning to associate a limited number of sponsors to the Conference, and we are writing to offer your company to be one of them. Participation as a conference sponsor will benefit your company in many ways. For example, exposure to the industry through the promotional efforts of the conference organizers and gaining valuable insight into the future requirements of the key decision makers in the field of adaptive optics for astrophysical instrumentation.

Please find on the next page different partnership packages with detailed information.

Thank you for considering this offer and do not hesitate to contact us if you would like to share your ideas and discuss other partnership scenarios. We are flexible and willing to work with you to design a partnership package that will fulfill your needs.

Sincerely,

On behalf of the [AO4ELT6](#) Local Organizing Committee,
